

Air1 has been serving the community for the last 16 years and has done so in such a way that lives have been saved. The people of this community not only benefit from alternative positive music, but families are now able to listen to the same radio station as a unit. If my local AIR1 was to be replaced by an LPFM broadcaster program, the local community will be deprived of spiritual resources that have for years prevalently affected lives of both young and old, rich and poor. Also, the positive music that people such as myself, look forward to listening to from the time I wake up to the minute I lay my head to sleep (and all time in between) will not be accessible to spiritually lift me up and ready for the day, and in return make me a more functioning individual of the society. I believe that the service provided by AIR1 is vital to the public interest because it brings the gospel to those who would not normally attend a church or listen to any other Christian music of the caliber that AIR1 plays. Please help us, the radio listeners, keep the AIR1 frequencies up and running. God Bless:)
